## **DUAL Product Oversight and Governance Arrangements**

Following the implementation of the Insurance Distribution Directive ['IDD'] on 1st October 2018 and the Pricing Practices changes from 1st October 2021 and 1st January 2022, this document outlines DUAL's approach to Product Oversight and Governance to demonstrate the way we design, monitor, review and distribute our insurance products.

#### Why are we telling you this?

As part of the regulatory framework DUAL adheres to, we are informing you of the product governance arrangements we have in place for designing, monitoring, reviewing, and distributing of this product. The key areas outlined cover the various processes we have in place to monitor our products as well as the information we may require from brokers/coverholders (distributors) throughout the lifecycle of a product.

## **Product Development Process**

The product development process has been designed to ensure that we have a consistent approach to the development of new products, or significant revisions to existing products.

#### **Product Review Process**

The product review process ensures that those already within the market continue to be designed in a way that meets the needs of the target market and offers fair value to consumers.

This document confirms the target market, product information and has been assessed as having Fair Value using MI relating to the following:

- Nature of the product and the coverage provided
- Cancellation rates
- Claims volumes, declinature rates and average claims pay out
- Loss ratios
- Customer feedback including complaint volumes and root cause analysis
- Pricing model and the total acquisition costs including commissions and other distributor remuneration
- The reasonableness of any admin and/or cancellation fees
- Suitability of the distribution strategy

## Information for brokers and other distribution partners

As we carry out these reviews, we may request information from brokers/coverholders to be able to evidence that our products are being distributed as intended - examples of this could be evidence that the product has been sold to the right target market or complaints received relating to the product. In most instances we will hold this data already on our systems, but there will be occasions when we may request it from relevant brokers. We will endeavour to provide adequate notice where we seek this information from you.

### **Further Information**

If you have any questions, please contact your DUAL representative.
